

Company Profile

INDUSTRIAL • HEAVY EQUIPMENT • MARINE SUPPORT

Reliable Partner for Heavy Equipment & Engineering Solutions

JESLYN JAYA TEKNIK
Solution For Your Business

CV JESLYN JAYA TEKNIK

Your Trusted Partner in Fabrication, Repair & Supply

COMPANY OVERVIEW

CV. JESLYN JAYA TEKNIK was established in 2020, in response to government regulations related to import restrictions (**Lartas**), which created the need for reliable local support in the mining and industrial sectors.

We are committed to supporting mining operations by providing high-quality fabrication, repair, and spare parts solutions to improve equipment availability and operational efficiency.

With a strong focus on reliability, speed, and precision, we aim to be a trusted partner in ensuring continuous and efficient operations for our clients.

VISION

To become a trusted and leading company in supporting mining and heavy equipment operations through reliable, efficient, and high-quality solutions.

- ✓ Established in 2020
- ✓ Mining Support Specialist
- ✓ Focus on Efficiency & Availability

MISSION

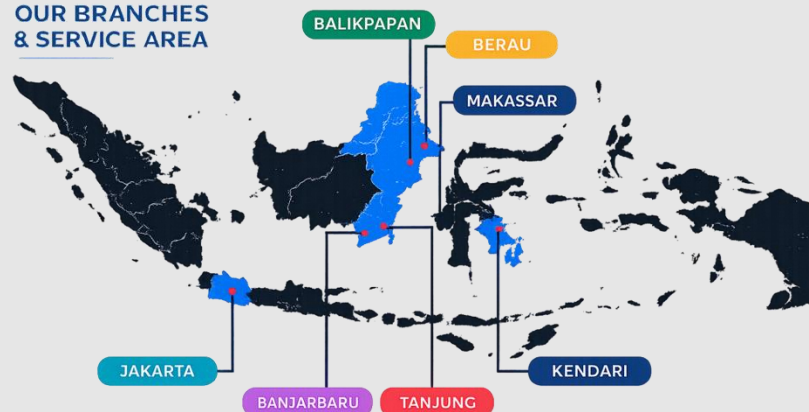

1. Deliver high-quality products and services that meet industry standards and customer expectations.
2. Support mining operations with fast, reliable, and cost-effective solutions.
3. Build long-term partnerships with clients based on trust, professionalism, and integrity.
4. Continuously improve our capabilities in engineering, fabrication, and technical services.
5. Maintain commitment to safety, efficiency, and operational excellence.

OUR BRANCHES & SERVICE AREA

This presentation is focused
Our location is strategically
positioned to ensure fast
delivery, quick response,
and efficient support for
mining and heavy
equipment operations.

Our Services

Complete Workshop Solutions for Heavy Equipment

Jeslyn Jaya Teknik specializes in fabrication, machining, hydraulic cylinder repair, and heavy equipment component rebuild services. We support mining contractors, industrial companies, and fleet owners with reliable workshop solutions built for tough operational demands. From custom bushing, pin, tanks, steel structures, and machining works to engine overhaul, final drive, transmission rebuild, and full refurbishment, our team delivers quality workmanship with fast turnaround.

Scope of Work:

Fabrication Services

Custom fabrication for heavy equipment, structures, and supporting components based on operational needs.

Repair & Overhaul

Handling repair, reconditioning, and overhaul for various mechanical components and equipment.

Engineering Support

Providing technical solutions, modification, and improvement to enhance equipment performance.

Workshop Services

Equipped workshop to support fabrication, machining, and repair activities with reliable workmanship.

TJ-PARTS
SOLUTION FOR FUTURE

TJ Industrial
Industrial Parts & Service

Supporting faster turnaround, better quality control, and cost efficiency for all project needs.

Our core Business

CV JESLYN JAYA TEKNIK

Engineering, Fabrication & Repair Support

Fabrication Works

Custom fabrication for heavy equipment, structural components, and operational support needs.

Repair & Overhaul Services

Handling repair, reconditioning, and overhaul of mechanical components and equipment.

Component Rebuild

Rebuilding major components such as engines, hydraulic systems, and transmissions to restore performance.

Engineering & Modification

Providing technical solutions, design improvements, and equipment modification to enhance productivity.

SOLUTION FOR FUTURE

TJ Industrial
Industrial Parts & Service

Fabrication Works

Producing high-precision metal components such as **pins, bushings, and custom parts through reverse engineering and drawing redevelopment**, ensuring compatibility, durability, and optimal performance for various applications.

Engineering & Design

Supporting fabrication and repair activities through reverse engineering, drawing reconstruction, and design improvement to ensure each component meets required specifications and performs reliably in operation.

Fabrication ,Machining and custom

Providing precision CNC machining and fabrication for all metal-based components, including **pins, bushings, shafts, and custom parts**. We deliver high-accuracy manufacturing, repair, and reconditioning solutions to ensure strength, durability, and reliable performance in heavy equipment operations.

- CNC Machining & Precision Engineering
- Pins, Bushings & Metal Component Manufacturing
- Custom Parts & Reverse Engineering
- Repair, Reconditioning & Modification

Precision CNC Machining

Advanced machining capabilities ensuring high accuracy, consistency, and quality for heavy equipment components.

Repair & Overhaul Services

Handling repair, reconditioning, and overhaul for various mechanical components and equipment.

TJ-PARTS
SOLUTION FOR FUTURE

TJ Industrial
Industrial Parts & Service

Delivering end-to-end solutions for machine components, including exchange programs, maintenance, and servicing of customer-owned units. Our approach is focused on minimizing downtime, maximizing efficiency, and reducing operational costs, supported by reliable and competitive warranty coverage.

Our Brand

Brand: TJ PARTS

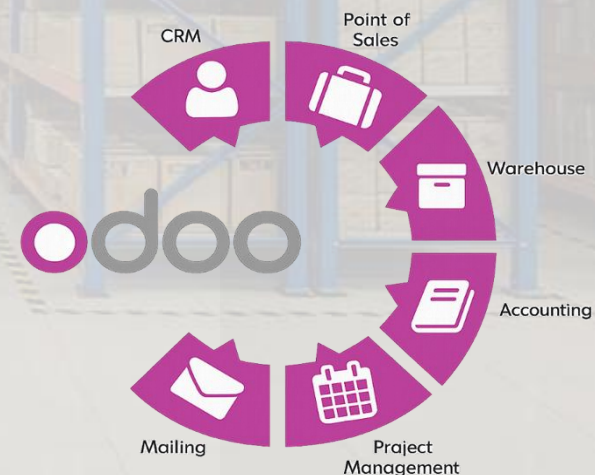

TJ Parts manufactures high-quality pins and bushings with precision engineering to ensure durability and optimal performance for heavy equipment applications."
